Guardian.—"This is the nearest approach to the ideal School History of England which has yet been written. It is of reasonable length. A just proportion between the several periods is carefully observed. Every page bears the stamp of the practised historian and the practised teacher. Unmistakable marks of the historical insight and the historical judgment which appertain only to the aristocracy of historians are everywhere visible; but the special characteristic which to our mind raises Mr. Oman's work distinctly above previous efforts in the same direction is the gift which Matthew Arnold used to call 'lucidity.' Every sentence rings out clear and sound as a bell, without any of that affectation of childishness which was once so common, without any of the heavy dulness usually so painfully prevalent."

Saturday Review.—"Mr. Oman has the knowledge of a scholar, and the art of a teacher, and we do not wonder that he has given us what we believe will be the standard school-book on this subject for many years to come."
