

- *Variety of Birds' Nests.*

How different also are the forms, and the manner of building their nests!

Some birds collect dead grass, roots, or straw, with which they make the outside of the nest, and then line it inside with soft feathers, moss, wool, or hair.

Some build their nests with straw or small sticks, and cement them with clay or mud; others unite them with gum, and line them with hair, or some other soft substance.

Some kinds of birds form their nests of tow, fine bark, flax, or hemp, and suspend them on the limbs of trees.

LESSON 10.

Ob du rate	pol i cy	butterfly
ob li gate	pov er ty	buttery
ob sti nate	pos i tive	cultivate
oc cu py	prod i gal	customer
oc ta gon	prop er ty	cursory
of fer ing	pros o dy	cutlery
of fi cer	prov en der	gunnery
op e rate	prov i dence	justify
op u lent	prox i mate	lustily
or a tor	rob be ry	mulberry
or der ly	rot ten ness	nullify
or i fice	sol em nize	nursery
or i gin	sol i tude	publican
or na ment	sol ven cy	publisher
op ti cal	sor row ful	rustical
or gan ize	tol er ance	summary
os si fy	tol er ate	turpentine
pop u lar	trop i cal	ultimate
